Change Decimal to Fraction

Worksheet: A Comprehensive Guide

Decimals and fractions are two fundamental concepts in mathematics that often need to be converted from one form to another. Whether you're a student, teacher, or just someone looking to brush up on your math skills, understanding how to change a decimal to a fraction is a valuable skill. This guide will walk you through the process, provide practical examples, and offer a free worksheet to help you practice.

Understanding Decimals and Fractions

Before diving into the conversion process, it's essential to understand what decimals and fractions represent. A decimal is a number that uses a base-10 system, with a decimal point to separate the whole number part from the fractional part. For example, 0.5 is a decimal that represents half of a whole.

A fraction, on the other hand, represents a part of a whole and consists of a numerator (the top number) and a denominator (the bottom number). For instance, $\frac{1}{2}$ is a fraction that also represents half of a whole.

Steps to Convert a Decimal to a Fraction

Converting a decimal to a fraction involves a few straightforward steps. Here's a step-by-step guide:

1. **Step 1: Write the Decimal as a Fraction**

Start by writing the decimal as a fraction with a denominator of 1. For example, if you have the decimal 0.5, write it as $0.5/1$.

2. **Step 2: Eliminate the Decimal Point**

To eliminate the decimal point, multiply both the numerator and the denominator by 10, 100, 1000, etc., depending on the number of decimal places. For $0.5/1$, multiply both by 10 to get $5/10$.

3. **Step 3: Simplify the Fraction**

Simplify the fraction by dividing both the numerator and the denominator by their greatest common divisor (GCD). For $5/10$, the GCD is 5, so divide both by 5 to get $1/2$.

Practical Examples

Let's look at a few examples to solidify your understanding.

Example 1: Converting 0.75 to a Fraction

1. Write 0.75 as $0.75/1$. 2. Multiply both numerator and denominator by 100 to get $75/100$. 3. Simplify $75/100$ by dividing both by 25 to get $3/4$.

Example 2: Converting 0.666... to a Fraction

1. Write 0.666... as $0.666.../1$. 2. Multiply both numerator and denominator by 999 to get $666/999$. 3. Simplify $666/999$ by dividing both by 333 to get $2/3$.
