What Types of Questions Are Included?

In 2022, the assessment typically includes three main sections:

1. **Programming Coding Questions:** Usually two to three problems requiring implementation in languages like Java, Python, or C++.
2. **Multiple-Choice Questions:** Covering topics such as data structures, algorithms, and sometimes theoretical computer science concepts.
3. **Work Style Assessment:** A set of behavioral questions aimed at understanding a candidate's alignment with Amazon's leadership principles.

The coding questions often test concepts like arrays, strings, linked lists, trees, and dynamic programming. Efficiency is crucial, so solutions must not only be correct but optimized for time and space complexity.

Sample Question Types in 2022

A typical coding problem might be: *"Given an array of integers, find the length of the longest subarray where the absolute difference between any two elements is less than or equal to 1."* Another example is implementing an algorithm to determine if a binary tree is balanced.

Multiple-choice questions might test knowledge of Big O notation, the behavior of sorting algorithms, or the properties of certain data structures.

Preparing Effectively for the Assessment

Success in the Amazon SDE online assessment involves strategic preparation:

1. **Practice Coding Problems:** Utilize platforms like LeetCode, HackerRank, and CodeSignal to familiarize yourself with common problem patterns.
2. **Review Data Structures and Algorithms:** Ensure a solid grasp of arrays, linked lists, stacks, queues, trees, graphs, sorting, searching, and dynamic programming.
3. **Simulate Real Test Conditions:** Time yourself and practice coding in a restricted environment to mirror the online assessment setting.
4. **Understand Amazon's Leadership Principles:** These principles influence behavioral questions and even how technical questions are framed.

Final Thoughts
