What Is Cybertext?

Cybertext refers to a form of textuality that incorporates user interaction as an integral part of the reading experience. Unlike traditional texts, which present a fixed narrative, cybertexts require readers to engage, make choices, or solve puzzles to navigate the content. This concept was extensively explored by Espen J. Aarseth in his book "Cybertext: Perspectives on Ergodic Literature," where he highlights how the act of reading becomes a participatory process.

Understanding 'I See the Light' in Cybertext Contexts

The phrase "I See the Light" often symbolizes moments of enlightenment or discovery within narratives. In cybertext, such moments are not merely thematic but also structural, as the reader's interaction may lead to multiple possible revelations or answers. For instance, a puzzle embedded in a digital story might culminate in a metaphorical 'light' – an insight or solution that the reader uncovers.

How Cybertext Answers Are Structured

Cybertext answers often emerge from the reader's active navigation of the text. This can take the form of:
