Common Issues and Troubleshooting

Old Onan generators, while robust, can develop issues over time. Here are some common problems and how to address them:

Engine Won't Start

If your generator's engine won't start, check the fuel level, spark plug, and air filter. Ensure the choke is set correctly and that there's no fuel blockage.

Overheating

Overheating can be caused by a clogged air filter, low oil level, or a faulty cooling system. Regular maintenance can prevent these issues.
