Drug abuse among school-aged children remains a pressing public health issue with multifaceted causes and consequences. This article provides an in-depth analysis of how short drama scripts serve as an educational and preventive measure within school environments.

Context: The Prevalence and Challenges of Drug Abuse in Schools

Recent studies indicate a troubling rise in drug use among adolescents, often influenced by peer pressure, curiosity, and socio-economic factors. Schools, though primarily academic institutions, are critical arenas where early intervention can occur. However, conventional methods of awareness often fail to resonate effectively with students.

The Strategy of Using Drama as an Intervention

Through dramatization, the long-term effects of drug abuse—academic decline, health deterioration, social isolation, and legal troubles—are vividly portrayed. This not only informs but also emotionally connects with students, potentially motivating behavioral change.

Implementation and Impact Assessment

Integrating short drama scripts into school curricula or extracurricular activities requires coordination among educators, counselors, and sometimes external organizations.
