Each of these categories requires a different set of skills and strategies. Let's dive into some specific examples and solutions.

## Sample Questions and Answers

Here are some sample questions that you might encounter in an Amazon Tier 3 interview, along with detailed solutions.

## Question 1: Basic Arithmetic

**Question:** If a train travels 300 miles in 5 hours, what is its average speed in miles per hour?

**Answer:** To find the average speed, divide the total distance by the total time. So, 300 miles / 5 hours = 60 miles per hour.

## Question 2: Algebra

**Question:** Solve for  $x$ :  $2x + 5 = 15$

**Answer:** Subtract 5 from both sides to get  $2x = 10$ . Then, divide both sides by 2 to get  $x = 5$ .

## Question 3: Geometry

**Question:** What is the area of a triangle with a base of 10 units and a height of 6 units?

**Answer:** The area of a triangle is given by the formula (base \* height) / 2. So,  $(10 * 6) / 2 = 30$  square units.

## Question 4: Probability

**Question:** If you have a deck of 52 playing cards, what is the probability of drawing a heart?

**Answer:** There are 13 hearts in a deck of 52 cards. So, the probability is  $13/52$ , which simplifies to  $1/4$  or 0.25.

## Question 5: Word Problems

**Question:** A store sells 50 items per day. If the store wants to sell 1,000 items, how many days will it take?

**Answer:** Divide the total number of items by the number of items sold per day. So,  $1,000 \text{ items} / 50 \text{ items per day} = 20 \text{ days}$ .
