First, Do No Harm: The Dramatic Story of Real Doctors and Patients Making Impossible Choices at a Big City Hospital by Lisa Belkin

In the bustling heart of a major city, where the hum of life is constant and the pace is relentless, there exists a place where the most profound decisions are made every day. This is the story of a hospital, its doctors, and the patients who walk through its doors, each with their own unique journey. Lisa Belkin's "First, Do No Harm" is a gripping narrative that delves into the ethical dilemmas, emotional struggles, and heroic efforts that define the world of medicine.

The Ethical Tightrope

The title of Belkin's book is a nod to the Hippocratic Oath, which binds doctors to the principle of "First, do no harm." But what happens when the choices are not so

clear-cut? In a big city hospital, resources are limited, time is of the essence, and every decision can have life-altering consequences. Belkin explores these complexities through the eyes of real doctors and patients, painting a vivid picture of the moral tightrope that medical professionals must walk.

The Human Stories

At the heart of "First, Do No Harm" are the stories of the people who inhabit the hospital. There's the young resident doctor, fresh out of medical school, grappling with the weight of responsibility for the first time. There's the seasoned surgeon who has seen it all but still struggles with the emotional toll of his work. And then there are the patients, each with their own hopes, fears, and stories, who entrust their lives to these medical professionals.

The Impossible Choices

Belkin doesn't shy away from the tough questions. She examines the ethical dilemmas that arise when resources are scarce and demands are high. Who gets the last available bed in the ICU? How do you allocate limited funds for life-saving treatments? These are the kinds of questions that keep hospital administrators and doctors up at night, and Belkin brings them to life with

compelling narratives and real-world examples.
