Questions & Answers About microeconomics lesson 4 activity 34 answer key

No	Question	Answer
1	What is the Law of Demand as explained in Microeconomics Lesson 4 Activity 34?	The Law of Demand states that, ceteris paribus, there is an inverse relationship between the price of a good and the quantity demanded; as the price decreases, demand increases, and vice versa.

2	How do you calculate marginal utility according to Activity 34?	Marginal utility is calculated by finding the change in total utility resulting from consuming one additional unit of a good or service.
3	What determines market equilibrium in the context of Activity 34?	Market equilibrium is determined by the intersection point of the supply and demand curves where the quantity supplied equals the quantity demanded, establishing the market price.
4	What are the effects of a price ceiling as discussed in the answer key?	A price ceiling set below the equilibrium price leads to shortages because the quantity demanded exceeds the quantity supplied, causing inefficiencies in the market.
5	How is price elasticity of demand illustrated in Activity 34?	Price elasticity of demand is illustrated by calculating the percentage change in quantity demanded divided by the percentage change in price, indicating how sensitive consumers are to price changes.
