Rooted in the belief that nursing is an interpersonal process, this theory has been the subject of numerous scholarly articles exploring its application, impact, and evolution.

Introduction to Peplau's Theory

Developed by Hildegard Peplau in the mid-20th century, the theory focuses on the nurse-patient relationship as a dynamic, evolving interaction. Unlike traditional models where nursing was viewed mainly as task-oriented, Peplau emphasized the therapeutic alliance between nurse and patient as a critical component of healing and care.

Core Concepts Explored in Scholarly Articles

Scholarly literature frequently highlights key components of the theory: the phases of the nurse-patient relationship (orientation, identification, exploitation, and resolution), the roles assumed by nurses (stranger, resource, teacher, leader, surrogate, counselor), and the importance of communication skills. These concepts are often discussed within various clinical contexts, from mental health to community nursing.

Application in Contemporary Nursing Practice

Research articles showcase how Peplau's theory informs modern nursing interventions. For example, mental health nursing extensively incorporates the interpersonal process to foster patient trust and facilitate recovery. Additionally, numerous studies analyze how this theory enhances communication, patient satisfaction, and outcomes across diverse healthcare settings.
